

# Blood circulatory system

## Worksheet

### I. Completes the flowchart:

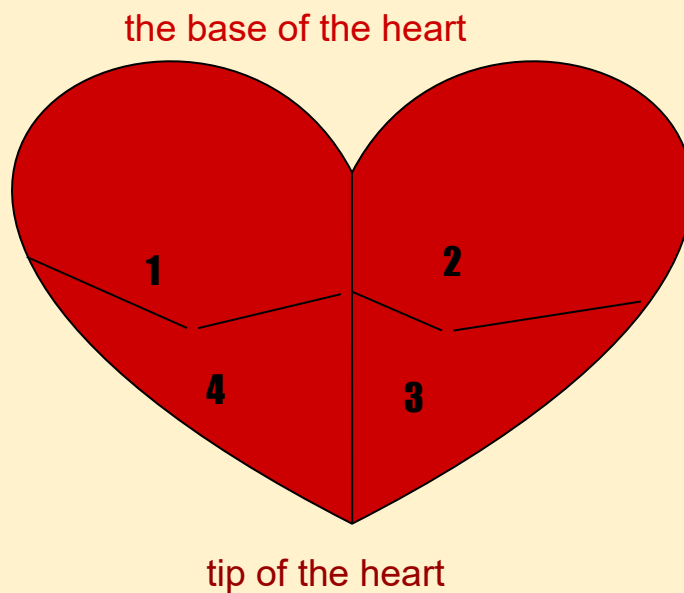

The circulatory system consists of:

.....→ blood →.....

### II. Locates the rooms of the heart and completes the legend with the name using the specific terms: right atrium ( $A_D$ ), right ventricle ( $V_D$ ), left atrium ( $A_S$ ), left ventricle ( $V_S$ ).

1- ?

2-?

4-?

3-?

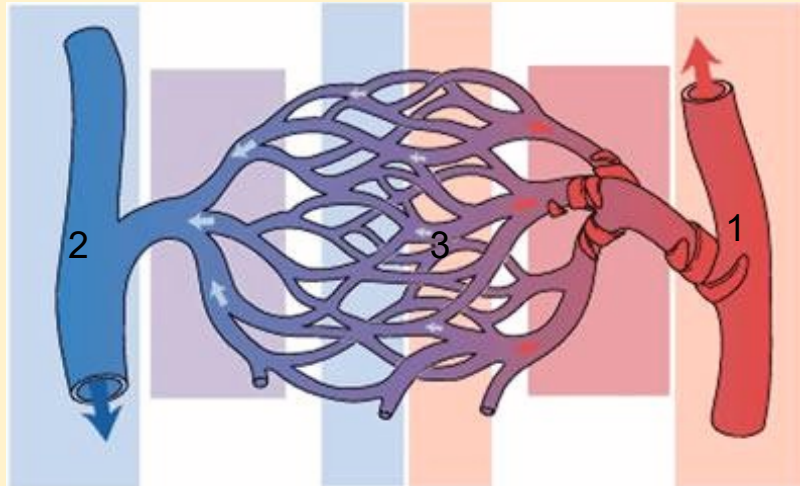

### III. Choose and mark the correct version with green color:

The right half of the heart contains *oxygenated/non-oxygenated* blood.

The *capillaries/veins* are the smallest blood vessels.

The heart muscle is called the *myocardium/pericardium*.

IV. It identifies the structures denoted from 1-3 and fills in the table the name, an anatomical feature and a function of them.

1).....	• •
2).....	• •
3).....	• •

Good luck at work!
