

Planet Ocean: Why the Blue Economy is so Important - Part I

Complete the quiz and when you submit your answers, you will receive a certificate (if your score is over 80%).

* Required

1. Email *

2. Full Name

3. Most of the Earth is covered by oceans. *

Mark only one oval.

True

False

4. The oceans are not connected to each other. *

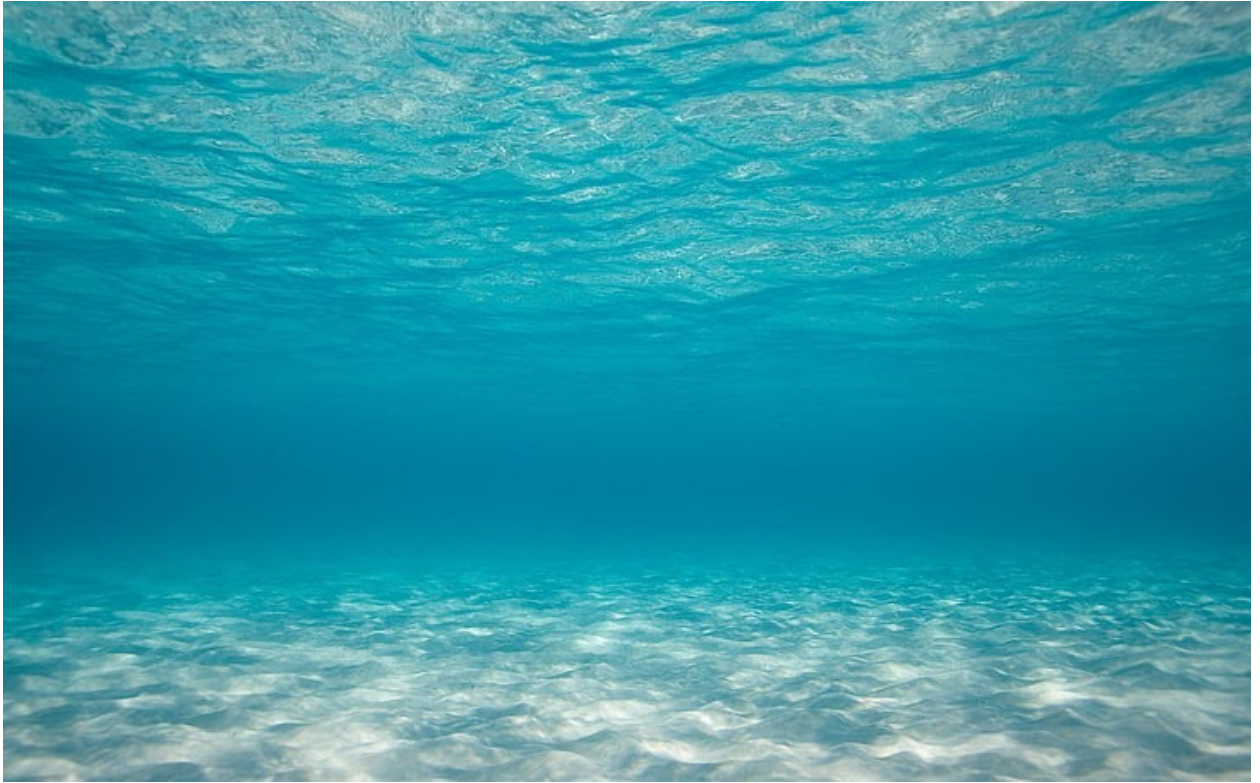

Mark only one oval.

True

False

5. The planet's salt water is a single mass, called the "global ocean". *

Mark only one oval.

True

False

6. In the northern hemisphere water covers 80% of its surface, while in the southern hemisphere 20%. *

Mark only one oval.

True

False

7. The Atlantic is the largest and deepest ocean. *

Mark only one oval.

True

False

8. The deepest point of the Pacific Ocean is the Mariana Trench. *

Mark only one oval.

True

False

9. The Coral Sea is the largest and deepest sea. *

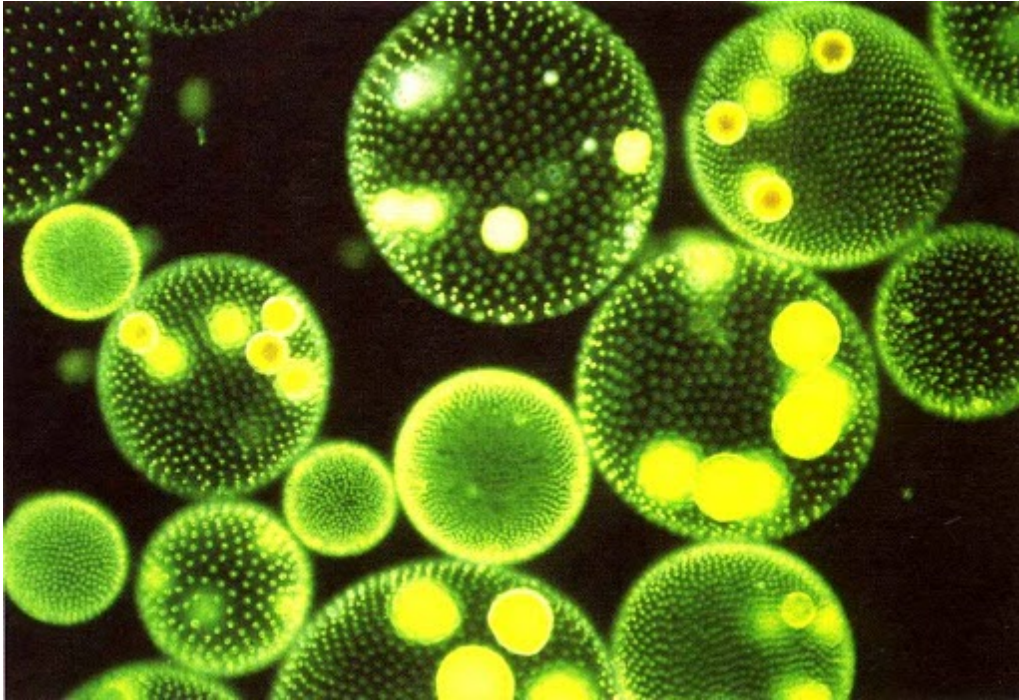

Mark only one oval.

True

False

10. Most of the Earth's oxygen (85%) is produced by phytoplankton. *

Mark only one oval.

- True
- False

11. Phytoplankton is also the basis of the food chain for ecosystems. *

Mark only one oval.

- True
- False

12. Oceans and seas occupy 1/4 of the Earth's surface. *

Mark only one oval.

- True
- False

13. In the ocean subsoil there are significant quantities of oil and gas (over 65% of world production). *

Mark only one oval.

True

False

14. Sea currents from the oceans neutralize the uneven distribution of heat on the planet and affect global climate. *

Mark only one oval.

- True
- False

15. Fish is the main source of protein for 30 million people. *

Mark only one oval.

True

False

16. The threats that the oceans face come mainly from human activities on land and less from the sea, at a ratio of 60:40%. *

Mark only one oval.

- True
- False

17. When there is a ship accident, the oil spilled into the sea can poison a variety of marine organisms, but without depriving them of oxygen, inhibiting, thus, photosynthesis. *

Mark only one oval.

True

False

18. The absorption of CO₂ from the oceans can mitigate the effects of climate change, but at the same time can make them more acidic and inhospitable to marine organisms. *

Mark only one oval.

- True
- False

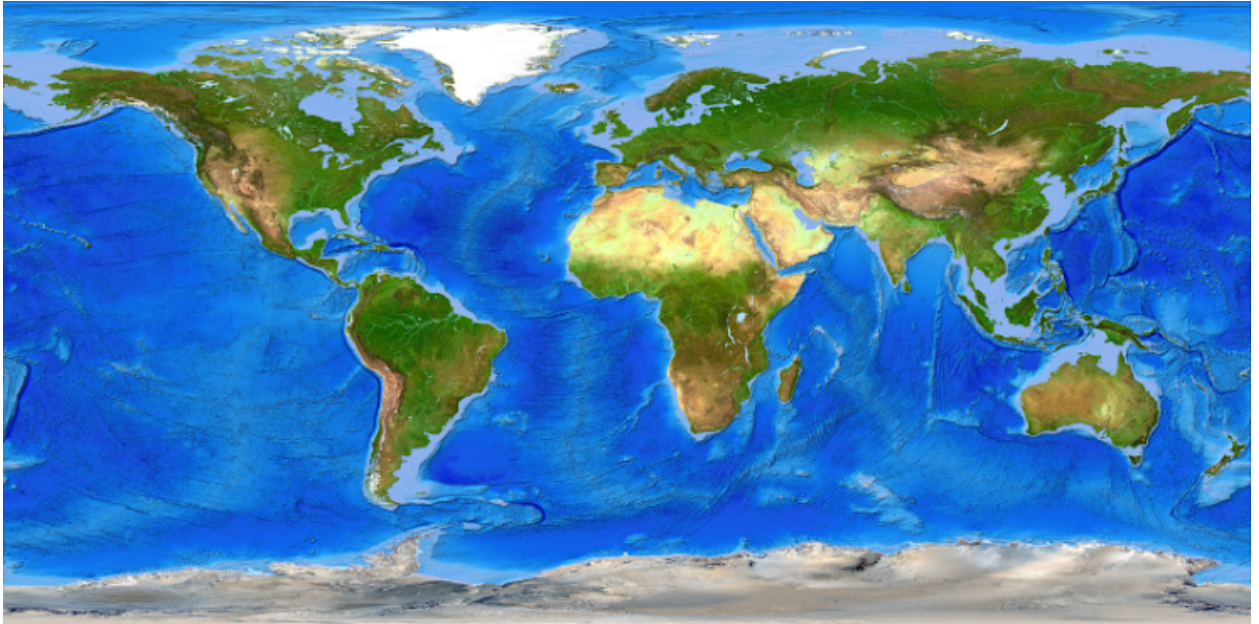

19. Which of the following seas belong to the Atlantic Ocean? *

Check all that apply.

- Mediterranean Sea
- Red Sea
- White Sea
- Bering Sea
- Arctic Sea
- Sea of Okhotsk
- Black Sea
- Arabian Sea
- Caribbean Sea
- North Sea
- Sea of Japan
- South China Sea
- Norwegian Sea
- Coral Sea

20. Correspond the countries to the sea they belong to. *

Mark only one oval per row.
